

2024 Half Marathon Distance Camp Training

Definitions to know:

RPE (Rate of Perceived Exertion): Your speed work is set to a level *8* defined as “Feels uncomfortable, can barely speak a sentence” This puts your body into an Anaerobic capacity. In our training this RPE of 8 should only apply when doing speed work.

Example : 7 Mile Speed | 2 Mile Warm Up; 3 x 800 RPE 8 w/ 800 Recovery; 2 Miles Cool Down

You should be at an RPE of 8 during the 3 bouts of 800M with a recovery (walk or jog) for 800M between each set. If you have questions, please ask your team leader or reach out to Forrest or one of the Specialists.

Cross train: Cross training can be anything that gets your body moving for 30min-1hr (Yoga, Pilates, HIIT, or strength training)

Active recovery: (Less physically demanding cross training) - this could look like playing with your family or pets, taking a walk etc.

Rest: This is what it is, reduce movement, practice self care, let your body rest as much as possible that day, focus on feeding your body and letting it recover.
